Pre-Workshop Checklist

- Take a look at the **Syllabus** to get an overview of the workshop

Additional Resources

Workshop-Specific Resources

Workshop syllabus - This workshop's motivator, prerequisites, learning outcomes and schedule.

NOTE: Email me your resume (PDF) to get it reviewed at udara.weera+resume@gmail.com

Getting the interview
- **Resume Template** by careercup. A good reference point for an easily digestible resume structure.
- Referrals
    - **Article 1** with templates to ask for referrals whether you have a friend or don't know anyone that works at the company.
    - **Article 2** on asking for referrals and why they're so effective.
    - **A recruiter's perspective** on why referrals are important to a company's hiring process

Acing the interview
1. Practice algorithms at the following websites:
    - **Leetcode**
    - **Codewars**
    - **Hackerrank**
    - **Daily Coding Problem**
    - **Algo Expert** (paid)
2. **My article** on the principles you want to keep in mind during the coding interview. This is a deeper dive into what I cover during the workshop.
3. **Youtube video** of a good sample interview that follows all the principles to ace the interview. Note how much time is spent understanding the question before he starts to code.There are lots more videos like this! Watch them to see what you should be striving for.
